

AICTE – EDUSKILLS VIRTUAL INTERNSHIP · SUPPORTED BY SIEMENS

# Data Science Master

Virtual Internship — Summer Report

---

**Vineet Gupta**

B.Tech (CSE), 5th Semester, Section 3CSE2

Roll No. 2410030229 · IILM University, Greater Noida

*April 2026 – June 2026 | Grade: O (Outstanding)*

# Candidate & Program Overview

**STUDENT NAME**

Vineet Gupta

**ROLL NUMBER**

2410030229

**SEMESTER / SECTION**

5th / 3CSE2

**DEGREE**

B.Tech (Computer Science & Engineering)

**PROGRAM**

AICTE – EduSkills Virtual Internship

**DOMAIN**

Data Science Master (Siemens-supported)

**DURATION**

8 Weeks (April 2026 – June 2026)

**CERTIFICATE ID**

44d7b3aef729cae3c5be | Grade: O

University: IILM University, Greater Noida, U.P. | Institute Batch: 2024–2028

# Organization Profile

EduSkills Academy · AICTE · Siemens Industry Software

EduSkills Academy is an ISO 9001:2015 and ISO 20000-1:2018 certified organization operating under the theme “Nation Building Through Skills”, delivering the AICTE National Internship Portal's virtual internship programs.

## AICTE Collaboration

Operates under the patronage of the AICTE National Internship Portal, Ministry of Education, to empower engineering talent across India.

## Siemens Partnership

Siemens Industry Software supported the Data Science Master curriculum, built on the RapidMiner AI Hub (an Altair company) platform.

## Core Focus Domains

Artificial Intelligence, Data Science, MLOps, Cloud Computing, Cybersecurity, and Enterprise Automation.

# Problem Statement & Industry Context

## The Industry Gap

Engineering curricula teach data science theory extensively, but rarely provide hands-on exposure to a complete, enterprise-grade data science platform — covering data engineering, model building, deployment, and platform administration in one workflow.

## The Internship's Scope

This internship closes that gap through RapidMiner AI Hub — progressing from identifying AI/ML use cases, to data access and preparation, model building and validation, and finally deployment and enterprise platform administration.

# Core Project Objectives

1

## Use-Case Identification

Learn to identify business problems suitable for AI and machine learning solutions.

2

## Data Engineering

Access, transform, and work with multiple data sets, pivot tables, and simple text processing.

3

## Machine Learning

Build and validate classification, regression, clustering, and association-rule models.

4

## Advanced Data Prep

Master loops, branches, regular expressions, exception handling, and web APIs.

5

## Deployment & Monitoring

Deploy and monitor machine learning models and web applications.

6

## Platform Administration

Configure and manage RapidMiner AI Hub, Radoop, and real-time scoring.

# Technologies & Tools Used

RapidMiner AI Hub (Altair) skill tracks

## Applications & Use Cases

Business problem framing, CRISP-DM, visualization, model deployment & monitoring

## Data Engineering

Data access, transformations, multiple data sets, pivot tables, routines, text processing

## Machine Learning

Classification, regression, clustering, association rules, cross-validation, feature engineering

## Data Preparation (Master)

Loops & branches, advanced text processing, exception handling, logging, macros, web APIs

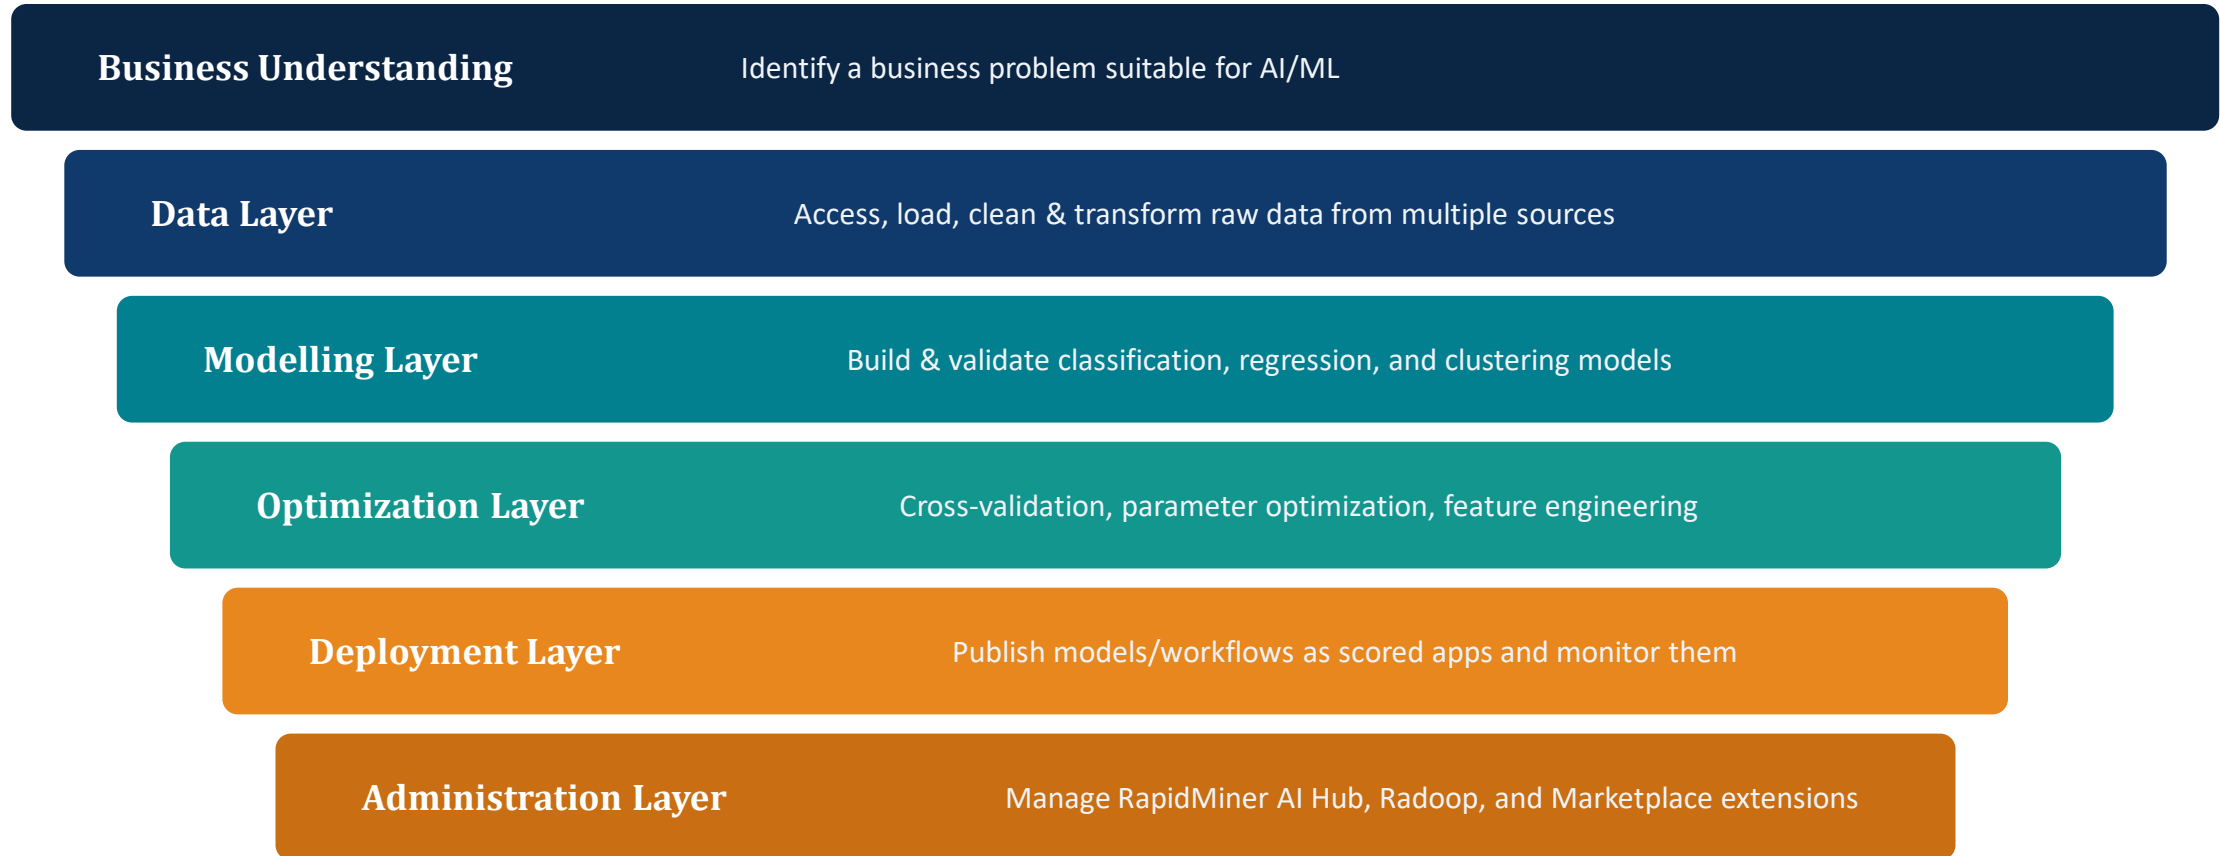

## Time Series & Modelling

Parameter optimization, model selection, time-series forecasting, R & Python integration

## Platform Administration

RapidMiner Studio install, AI Hub administration, Radoop, real-time scoring, Marketplace

# Data Science Workflow Architecture

# Week-Wise Methodology

8-week structured curriculum with weekly assessments and a Final Assessment Test

## WEEK 1

**Applications & Use Cases  
– Professional**

## WEEK 2

**Data Engineering –  
Professional**

## WEEK 3

**Machine Learning –  
Professional**

## WEEK 4

**Data Preparation –  
Master**

## WEEK 5

**Machine Learning –  
Master**

## WEEK 6

**Applications & Use Cases  
– Master**

## WEEK 7

**Platform Administration  
– Master**

## WEEK 8

**Platform Administration  
(Enterprise Ops)**

# Expected Outcomes

- 1 Independently identify business problems suitable for AI/ML solutions
- 2 Access, transform, and handle multi-dataset data engineering tasks
- 3 Build, validate, and optimize classification, regression & clustering models
- 4 Apply advanced data preparation: loops, branches, regular expressions
- 5 Deploy and monitor machine learning models in a web application setting
- 6 Administer an enterprise data science platform (RapidMiner AI Hub, Radoop)

*Final Result: Grade O (Outstanding) — Certificate ID 44d7b3aef729cae3c5be*

# Certification & Proof of Completion

## Certificate of Virtual Internship

Issued by EduSkills Academy, supported by Siemens Industry Software, under AICTE's National Internship Portal. Grade: O (Outstanding).

Applications & Use Cases – Professional & Master

Data Engineering – Professional & Master

Machine Learning – Professional & Master

Platform Administration – Master

*Full offer letter and RapidMiner skill certificates are included in the accompanying Internship Report.*
